Sound Recordist

Over 10 years of experience working in drama TV and feature films. I have worked from the bottom up, joining the industry in 2014 after successfully completing an electrical apprenticeship.

I have worked as a boom operator on sets large and small with hands in every aspect of roles within the sound department to hone my own skills in the delivery of clean sync dialogue, effects and atmos. I have great experience with large performances with playback and distribution of audio to various departments and sound solutions for voice of god, queuing, earwigs and time code sync.

I have a great understanding for what is needed on film sets and how to achieve them quickly and perfectly.
